Factfulness - Hans Rosling 2018-04-03
INSTANT NEW YORK TIMES BESTSELLER
"One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our

inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting

worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

The Age of Reason - Thomas Paine 2021-01-30
"The Age of Reason" is an influential work by Thomas Paine that follows in the tradition of eighteenth-century British deism, and challenges institutionalized religion and the legitimacy of the Bible. It presents common deistic

arguments; for example, it highlights what Paine saw as corruption of the Christian Church and criticizes its efforts to acquire political power. Paine advocates reason in the place of revelation, leading him to reject miracles and to view the Bible as "an ordinary piece of literature rather than as a divinely inspired text". It promotes natural religion and argues for the existence of a creator-God. The Age of Reason is divided into three sections. In Part I, Paine outlines his major arguments and personal creed. In Parts II and III he analyzes specific portions of the Bible in order to demonstrate that it is not the revealed word of God. Most of Paine's arguments had long been available to the educated elite, but by presenting them in an engaging and irreverent style, he made deism appealing and accessible to a mass audience.

Transnational Pakistani Connections - Katharine Charsley 2013-11-12

Since restrictions on commonwealth labour immigration to Britain in the 1960s, marriage has been the dominant form of migration between Pakistan and the UK. Most transnational Pakistani marriages are between cousins or other more distant relatives, lending a particular texture to this transnational social field. Based on research in Britain and Pakistan, this book provides a rounded portrayal incorporating the emotional motivations for, and content of, these transnational unions. The book

explores the experiences of families and individuals involved, including the neglected experiences of migrant husbands, and charts the management of the risks of contracting transnational marriages, as well as examining the consequences in cases when marriages run into conflict. Equally, however, the book explores the attractions of marrying 'back home', and the role of transnational marriage in maintaining bonds between people and places. Marriage emerges as a crucial, but dynamic and contested, element of Pakistani transnational connections. This book is of interest to students and scholars in the fields of migration studies, kinship/the family and South Asian studies, as well as social work, family law and immigration. Lord of the Flies - William Golding 2003-12-16
Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.
