Brokering Britain, Educating Citizens - Melanie Cooke  
2019-09-16

This book addresses the politically charged issue of citizenship and English language learning among adult migrants in the UK. Whilst citizenship learning is inherent in English for Speakers of Other Languages (ESOL), the book argues that top-down approaches and externally-designed curricula are not a productive or useful approach. Meaningful citizenship education in adult ESOL is possible, however, if it brings social and political content centre-stage alongside pedagogy which develops the capabilities for active, grassroots, participatory citizenship. The chapters deliver a detailed examination of citizenship and ESOL in the

UK. They address a range of community and college-based settings and the needs and circumstances of different groups of ESOL students, including refugees, migrant mothers, job seekers and students with mental health needs. The book draws attention to the crucial role of ESOL teachers as 'brokers of citizenship' mediating between national policy and the experiences and needs of adult migrant students. The book links together language pedagogy and citizenship theory with the practical concerns of ESOL teachers and students.

Becoming a Citizen - Kamran Khan 2019-01-24

This book explores the process of acquiring UK citizenship and investigates how the naturalisation process is experienced, with an explicit focus on language practices. This ethnographically-informed study focuses on W, a Yemeni

immigrant in the UK, during the final phase of the citizenship process. In this time, he encounters linguistic trials and tests involving the Life in the UK citizenship test, community life, ESOL (English for Speakers of Other Languages), adult education and the citizenship ceremony. The richness of linguistic data featured in this book allows for a nuanced portrayal of the complexities of becoming a citizen. This is especially so in the context of the UK's assimilationist form of citizenship which is reflected in the introduction of a citizenship test within a broader socio-political climate. *Becoming a Citizen* offers a detailed analysis of the linguistic process of naturalisation in the the UK and is relevant to scholars working in sociolinguistics, language policy, migration studies and ethnographic research.

The Theory and Practice of

Online Learning is an

illuminating collection of essays by practitioners and scholars active in the complex field of distance education.

Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But

recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.
