**Do You Matter?** - Robert Brunner 2008-08-12 "Definitely, a game changer! Design experience is the power shift to our era what mass marketing was to the last century." John Sculley former CEO, Pepsi and Apple "Great design is about creating a deep relationship with your customers. If you don't, you're roadkill. This book shows you how and much, much more. Be prepared to have your mind blown." Bill Burnett Executive Director, Design Program, Stanford University "Design is the last great differentiator, and yet so few really understand it. *Do You Matter?* offers a marvelous series of direct, in-your-face observations and drives home the means to an absolutely integrated

design strategy." Ray Riley Design GM, Entertainment and Devices, Microsoft "This book will challenge you to ask and answer what arguably are the most important questions an executive can ponder today. So open up." Noah Kerner CEO, Noise and coauthor, *Chasing Cool* More and more companies are coming to understand the competitive advantage offered by outstanding design. With this, you can create products, services, and experiences that truly matter to your customers' lives and thereby drive powerful, sustainable improvements in business performance. But delivering great designs is not easy. Many companies accomplish it once, or twice; few do it consistently. The secret: building a truly design-driven business, in which design is central to everything you do. *Do You Matter?* shows how to do precisely that. Legendary industrial designer Robert Brunner (who laid the groundwork for Apple's brilliant design language) and Stewart Emery (*Success Built to Last*) begin by making an incontrovertible case for the power of design in making emotional connections, deepening relationships, and strengthening brands. You'll learn what it really means to be "design-driven" and how that translates into action at Nike, Apple, BMW and IKEA. You'll learn design-driven techniques for managing your entire experience chain; define effective design strategies and languages; and learn how to manage design from the top, encouraging "risky" design innovations that lead to entirely new markets. The authors show how (and how not) to use research; how to extend design values into marketing, manufacturing, and beyond; and how to keep building on your progress, truly "baking" design into all your processes and culture.

**Shipping and Development in Dubai** - Keith Nuttall 2021-10-21

A small town on a sandy creek half a century ago, Dubai is now the largest trading, commercial, leisure and transport entrepot in the Gulf and wider region. This book explains the reasons for the emergence of Dubai and its distinctive development trajectory, arguing that the decision, in the 1970s, to invest in infrastructure made possible by shipping containerization laid the foundations for its future expansion. The book shows that in contrast to its competitors' hydrocarbon rentier

economic model, Dubai's creation and expansion of ports and airports, together with 'value-added' logistics and business-friendly enhancements, were used to out-compete regional rivals. Drawing on a range of primary and secondary sources, including interviews with logistics business-people, government records, memoirs, it fills a significant lacuna in the history of Dubai's development and emergence as a global trade hub.

**Political Economy and Sociolinguistics** -

David Block 2018-02-08

Shortlisted for the BAAL Book Prize 2019 This

book explores how political economy intersects with sociolinguistics, specifically how neoliberalism, inequality and social class mediate language in society issues. After the preface, in which the author sets the scene for the content of the book, Chapter 1 is an extensive, though selective, review of sociolinguistics research which has been framed as political economic in orientation. The chapter concludes that such research generally contains little in the way of thorough and in-depth coverage of the key ideas and conceptual frameworks said to undergird it. With this consideration in mind, Chapters 2, 3 and 4 are organised around in-depth discussions of, respectively, political economy as a general disciplinary frame; neoliberalism as the variegated variety of capitalism dominant in the world today; and stratification, inequality and social class, as phenomena intrinsic to capitalism, which in the neoliberal era have come to the fore as key issues. Drawing directly on the background provide in Chapters 2-4, Chapters 5 and 6 explore two distinct political economy-informed lines of research, on the one hand, the 'neoliberal citizen', and on the other hand, 'discursive class warfare'. The book ends with an epilogue addressing issues arising around political economy in sociolinguistics.

What does this mean for the identity of Emiratis living there and what are the implications for foreigners working there? **Constructing Identity in Contemporary**

**Architecture** - Peter Herrle 2009

Who are the actors feeling compelled to "construct" new identities? How are these new identities in architecture created in various parts of the world? And, which are the ingredients borrowed from various historical and ethnic traditions and other sources? These and other questions are discussed in five case studies from different parts of the world, written by renowned scholars from Brazil (Ruth Verde Zein), Mexico (Susanne Dussel), Egypt (Khaled Asfour), India (Rahul Mehrotra), and Singapore (William Lim). *The New Arab Urban* - Harvey Molotch 2019-02-05

Cities of the Arabian Peninsula reveal contradictions of contemporary urbanization The fast-growing cities of the Persian Gulf are, whatever else they may be, indisputably sensational. The world's tallest building is in Dubai; the 2022 World Cup in soccer will be played in fantastic Qatar facilities; Saudi Arabia is building five new cities from scratch; the Louvre, the Guggenheim and the Sorbonne, as well as many American and European universities, all have handsome outposts and campuses in the region. Such initiatives bespeak strategies to diversify economies and pursue grand ambitions across the Earth. Shining special light on Dubai, Abu Dhabi, and Doha—where the dynamics of extreme urbanization are so strongly evident—the authors of *The New Arab Urban* trace what happens when money is plentiful, regulation weak, and labor conditions severe. Just how do authorities in such settings reconcile goals of oft-claimed civic betterment with hyper-segregation and radical inequality? How do they align cosmopolitan sensibilities with authoritarian rule? How do these elite custodians arrange tactical alliances to protect particular forms of social stratification and political control? What sense can be made of their massive investment for environmental breakthrough in the midst of world-class ecological mayhem? To address such questions, this book's contributors place the new Arab urban in wider contexts of trade, technology, and design. Drawn from across disciplines and diverse home countries, they investigate how these cities import projects, plans and structures from the outside, but also how, increasingly,

Gulf-originated initiatives disseminate to cities far afield. Brought together by noted scholars, sociologist Harvey Molotch and urban analyst Davide Ponzini, this timely volume adds to our understanding of the modern Arab metropolis—as well as of cities more generally. Gulf cities display development patterns that, however unanticipated in the standard paradigms of urban scholarship, now impact the world.

### **Global Climate Change and Coastal Tourism**

**Market Orientalism** - Benjamin Smith 2015-07-28

Although the Arab states of the Persian Gulf are leaders in many of the measures of absolute wealth that have traditionally defined success in the global economy, they have had a much harder time becoming accepted in the equally fractured and hierarchal realm of the cultural economy, where practices, signs, and

perceptions of propriety matter. Market Orientalism examines how emerging markets are imagined as cultural economic spaces—spaces that are assembled, ranked, desired, and sometimes punished in ways built on earlier forms of dealing with "backward" economies and peoples. Such imaginations not only impact investment and guide policy, but also create stories of economic value that separate "us" from "them." While market Orientalism functions anywhere that questions of "deserved" wealth come down to cultural/economic differences between places, Smith focuses on the Arab states of the Gulf. By combining field research with extensive analysis of news archives concerning the cultural economies of the Gulf states, Market Orientalism addresses important motivations for economic relations and provides a framework to analyze how prejudice, fashion, taste, and waste are vital to both narrow and widespread forms of economic activity.
