## **Pakistans Foreign Policy 1947-2019** - Abdul Sattar 2020-07-09

Written with the express purpose of providing a reference book for students of history, political science, international relations, and Pakistan Studies, this book offers an objective history of policy stances along with the rationale behind decisions made by Pakistani state leaders. It provides an insight into the making, implementation, and consequences of Pakistans foreign policy from Partition up to 2019. It will facilitate a deeper understanding of the strategic compulsions that have driven decision making in Pakistans national security and foreign policy. This book incorporates new contours in relations with India, the US, China, and Afghanistan. Further updates pertain to developments in such key areas as terrorism, Kashmir, and the Middle East.

## **The Road To Mecca** - Muhammad Asad 1954

Part travelogue, part autobiography, "The Road to Mecca" is the compelling story of a Western journalist and adventurer who converted to Islam in the early twentieth century. A spiritual and literary counterpart of Wilfred Thesiger and a contemporary of T. E. Lawrence (Lawrence of Arabia), Muhammad Asad journeyed around the Middle East, Afghanistan and India. This is an account of Asad's adventures in Arabia, his inner awakening, and his relationships with nomads and royalty alike, set in the wake of the First World War. It can be read on many levels: as a eulogy to a lost world, and as the poignant account of a man's search for meaning. It is also a love story, defying convention and steeped in loss. With its evocative descriptions and profound insights on the Islamic world, "The Road to Mecca" is a work of immense value today.

## **Veterinary Herbal Medicine** - Susan G. Wynn 2006-11-29

This full-color reference offers practical, evidence-based guidance on using more than 120 medicinal plants, including how to formulate herbal remedies to treat common disease conditions. A body-systems based review explores herbal medicine in context, offering information on toxicology, drug interactions, quality control, and other key topics. More than 120 herbal monographs provide quick access to information on the historical use of the herb in humans and animals, supporting studies, and dosing information. Includes special dosing, pharmacokinetics, and regulatory considerations when using herbs for horses and farm animals. Expanded pharmacology and toxicology chapters provide thorough information on the chemical basis of herbal medicine. Explores the evolutionary relationship between plants and mammals, which is the basis for understanding the unique physiologic effects of herbs. Includes a body systems review of herbal remedies for common disease conditions in both large and small animals. Discusses special considerations for the scientific research of herbs, including complex and individualized interventions that may require special design and nontraditional outcome goals.

## **China's Belt and Road Initiative in a Global Context** - Jawad Syed 2019-09-30

Bringing together a collection of interdisciplinary chapters on China's Belt and Road Initiative (BRI), this book offers a comprehensive overview of the topic from a business and management perspective. With a focus on the China Pakistan Economic Corridor (CPEC), Volume II provides theoretical and empirical analyses of the opportunities and challenges facing businesses. With contributions covering economics, agriculture, energy, value chain, ethics, governance, and security, this collection is a useful tool for academics as well as policy-makers and practitioners in China, Pakistan, and other countries along the new Silk Road.

## **The Murder of History** - Khurshed Kamal Aziz 1998

## **Ethnobotany of the Himalayas** - Ripu M. Kunwar 2021-12-01

Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It

has by now widely been recognized that "traditional" knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly (the various societies, like the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, and the International Society for Ethnobiology currently have thousands of members). Growth has been most robust in BRIC countries. This new MRW on Ethnobotany of the Himalayas takes advantage of the increasing international interest and scholarship in the field of mountain research. It includes the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants in the Himalayas. Each contribution is scientifically rigorous and contributes to the overall field of study.

## **American Journal of Islamic Social Sciences 9:1** - Amriah Buang

The American Journal of Islamic Social Sciences (AJISS), established in 1984, is a quarterly, double blind peer-reviewed and interdisciplinary journal, published by the International Institute of Islamic Thought (IIIT), and distributed worldwide. The journal showcases a wide variety of scholarly research on all facets of Islam and the Muslim world including subjects such as anthropology, history, philosophy and metaphysics, politics, psychology, religious law, and traditional Islam.

## **Studies on Pakistan** - Sylvia Mishra 2014

## **Pakistan Beyond the Crisis State** - Maleeha Lodhi 2012-10-09

Seen through the lens of the outsider, Pakistan has often been reduced to a caricature. Its diversity and resilience have rarely figured in the single-issue focus of recent literature on the country, be it journalistic or scholarly. This book seeks to present an alternate paradigm and to contribute a deeper understanding of the country's dynamics that may help explain why Pakistan has confounded all the doomsday scenarios. It brings together an extra-ordinary array of leading experts, including Ahmed Rashid, Ayesha Jalal and Zahid Hussain, and practitioners, such as the book's editor, Maleeha Lodhi, Akbar Ahmed and Munir Akram. Together they debate their country's strengths and weaknesses and offer ways out of its current predicament. This book provides a picture of how Pakistanis see themselves and their country's faultlines and spells out ways to overcome these. Pakistan's political, economic, social, foreign policy and governance challenges are assessed in detail. So too is the complex interplay between domestic developments and external factors including great power interests that are so central to the Pakistan story and explain the vicissitudes in its fortunes. Lodhi and her contributors contend that Pakistan and its people have the capacity to transform their country into a stable, modern Muslim state, but bold reforms will be needed to bring about this outcome.

## **Chemical Kinetics and Catalysis** - Richard I. Masel 2001-04-13

Chemical Kinetics and Catalysis is a comprehensive guide to chemical kinetics and catalysis, and focuses on the use of computational tools for studying chemical kinetics and catalytic phenomena. Provides a thorough and up-to-date treatment of chemical kinetics and catalysis, combining traditional background information with the latest computational methods for fitting data to appropriate rate equations. Demonstrates how the vastly improved computational tools now available allow application

of kinetic concepts to understanding and predicting the behavior of diverse and complex phenomena, including biological systems, semiconductor growth, and corrosion. Contains chapters reviewing of kinetic concepts, introducing kinetics via rate equations and mechanisms, explaining the theory of reaction rates (a section on trajectory calculations to simulate reactions), predicting potential energy surfaces (methods for directing the reaction rate), and discussing catalysis with a focus on modifying the reaction rate. A useful reference guide, providing the essential basics along with numerous solved examples, problems, and illustrative computer programs.

**Amal Unbound** - Aisha Saeed 2020-01-07

A New York Times Bestseller! Amal has big dreams, until a nightmarish encounter . . . Twelve-year-old Amal's dream of becoming a teacher one day is dashed in an instant when she accidentally insults a member of her Pakistani village's ruling family. As punishment for her behavior, she is forced to leave her heartbroken family behind and go work at their estate. Amal is distraught but has faced setbacks before. So she summons her courage and begins navigating the complex rules of life as a servant, with all its attendant jealousies and pecking-order woes. Most troubling, though, is Amal's increasing awareness of the deadly measures the Khan family will go to in order to stay in control. It's clear that their hold over her village will never loosen as long as everyone is too afraid to challenge them--so if Amal is to have any chance of ensuring her loved ones' safety and winning back her freedom, she must find a way to work with the other servants to make it happen.

*Public Policy Research in the Global South* - Heike M. Grimm 2019-04-10

This volume focuses on the evolution of public policy and the role of agenda setting with regard to policymaking in countries of the Global South. The authors illustrate the emergence of public policy research as an academic discipline, and highlight various aspects of history, governance, politics, and economics as components of public policy theory development. By offering a cross-national perspective, the papers contribute to a better understanding of when, how, and by whom a given policy agenda is designed, which is essential to grasping how policy is implemented. In turn, the authors investigate how the development of public policy research has influenced policymaking in fields such as democratization, migration, corruption, agriculture, environment, education, and entrepreneurship and, more specifically, agenda setting in selected countries of the Global South.

**Perspectives on Contemporary Pakistan** - Ghulam Ali 2020-06-09

This book analyses problems of governance, development and environment affecting contemporary Pakistan; issues that lie at the centre of federal and provincial policy deliberations, formulation and implementation. The book offers a comprehensive assessment of the policies, or lack thereof. Authors from a variety of disciplines empirically and conceptually evaluate latest developments, events and data regarding law and order, economic under-performance, social intolerance and climate crisis. The book offers varied perspectives on state sovereignty, civil-military relations, spousal violence, rural development, CPEC, nuclear governance and transboundary climate risk. Arguing that the conclusions should be adopted by the social, political and economic stakeholders of Pakistan, as well as the region at the higher level of governability, the book demonstrates that it would both boost national morale and inspire individuals to further investigate to come up with innovative solutions. Examining some of the most pressing and persistent problems Pakistan and South Asia is facing, the book will be of interest to academics working in the fields of Political Science, in particular South Asian Politics, Development Studies and Environmental Studies.

**Recycled Waste Materials in Concrete Construction: Emerging Research and Opportunities** - Mirza, Jahangir 2019-04-30

Due to the demand for new urban construction, its repair, and its maintenance, the concrete and construction enterprises continue to grow, as do their use of finite natural resources. The industry is now

under pressure to seek ways to minimize the use of rapidly depleting natural resources. Effective utilization of various waste materials, often found in abundance, may be the key as they not only ward off deleterious environmental hazards, but they have also been known to produce wealth by adding value through ecology. *Recycled Waste Materials in Concrete Construction: Emerging Research and Opportunities* is a detailed scholarly resource that discusses different types of industrial, agricultural, and natural wastes that are either currently in use in the concrete industry or demonstrate potential for future use and how they can be used as additives or replacements for cement and other construction materials. Highlighting topics such as engineering properties, material durability, and raw materials, this book targets engineers, construction professionals, contractors, consulting firms, government officials, cement and waste material industries, policymakers, academicians, and researchers.
