Longevity Diet - Valter Longo 2018-01-31

The internationally renowned, clinically tested, revolutionary diet program to lose weight, fight disease, and live a longer, healthier life. Can what you eat determine how long, and how well, you live? The clinically proven answer is yes, and The Longevity Diet is easier to follow than you'd think. The culmination of 25 years of research on ageing, nutrition, and disease across the globe, this unique combination of an everyday diet and fasting-mimicking diet (FMD) to be done only 3-4 times per year lays out a simple solution to living to a healthy old age through nutrition. FMD does away with the misery and starvation most of us experience while fasting and helps you reap all the beneficial health effects of a restrictive diet while avoiding the negative stressors, like low energy and sleeplessness. Valter Longo, Director of the Longevity Institute at USC and the Program on Longevity and Cancer at IFOM in Milan, developed THE FMD after making a series of remarkable discoveries in mice and humans indicating that specific diets can activate stem cells and promote regeneration and rejuvenation in multiple organs to reduce the risk for diabetes, cancer, Alzheimer's and heart disease. Longo's simple pescatarian daily eating plan and the periodic, fasting-mimicking techniques can both yield impressive results. Low in proteins and sugars and rich in healthy fats and plant-based foods, The Longevity Diet is clinically proven to help you: Lose weight and reduce abdominal fat Make simple changes which can extend the healthy lifespan Prevent age-related muscle and bone loss Build your resistance to diabetes, cardiovascular disease, Alzheimer's and cancer Longo's healthy, life span-extending plan is based on an easy-to-adopt pescatarian plan along with the fasting-mimicking diet 4 times a year, and just 5 days at a time. The Longevity Diet is the key to living a longer, healthier, and more fulfilled life.

The Longevity Plan - John D. Day, M.D. 2017-07-04

From a renowned Johns Hopkins- and Stanford-educated cardiologist at Intermountain Medical Center—a hospital system that President Obama has praised as an "island of excellence"—comes the story of his time living in Longevity Village in China, and the seven lessons he learned there that lead to a happy, healthy, long life At forty-four, acclaimed cardiologist John Day was overweight and suffered from insomnia, degenerative joint disease, high blood pressure, and high cholesterol. On six medications and suffering constant aches, he needed to make a change. While lecturing in China, he'd heard about a remote mountainous region known as Longevity Village, a wellness Shangri-La free of heart disease, cancer, diabetes, obesity, dementia, depression, and insomnia, and where living past one hundred—in good health—is not uncommon. In the hope of understanding this incredible phenomenon, Day, a Mandarin speaker, decided to spend some time living in Longevity Village. He learned everything he could about this place and its people, and met its centenarians. His research revealed seven principles that work in tandem to create health, happiness, and longevity—rules he applied to his own life. Six months later, he'd lost thirty pounds, dropped one hundred points off his cholesterol and twenty-five points off his blood pressure, and was even cured of his acid reflux and insomnia. In 2014 he began a series of four-month support groups comprised of patients who worked together to apply the lessons of Longevity Village to their lives. Ninety-two percent of the participants were able to adhere to their plans and stay on pace to reach their health goals. Now Dr. Day shares his story and proven program to help you feel sharper, more motivated, productive, and pain-free. The Longevity Plan is not only a fascinating travelogue but also a practical, accessible, and groundbreaking guide to a better life.

What the Most Successful People Do Before Breakfast - Laura Vanderkam 2012-06-12

Mornings are a madcap time for many of us. We wake up in a haze—often after hitting snooze a few times. Then we rush around to get ready and out the door so we can officially start the day. Before we know it, hours have slipped by without us accomplishing anything beyond downing a cup of coffee, dashing off a few emails, and dishing with our coworkers around the water cooler. By the time the workday wraps up, we're so exhausted and defeated that any motivation to accomplish something in the evening has vanished. But according to time management expert Laura Vanderkam, mornings hold the key to taking control of our schedules. If we use them wisely, we can build habits that will allow us to lead happier, more productive lives. Drawing on real-life anecdotes and scientific research that shows why the early hours of the day are so important, Vanderkam reveals how successful people use mornings to help them accomplish things that are often impossible to take care of later in the day. While many of us are still in bed, these folks are scoring daily victories to improve their health, careers, and personal lives without sacrificing their sanity. For instance, former PepsiCo chairman and CEO Steve Reinemund would rise at 5:00 a.m., run four miles, pray, and eat breakfast with his family before heading to work to run a Fortune 500 company. *What the Most Successful People Do Before Breakfast* is a fun, practical guide that will inspire you to rethink your morning routine and jump-start your life before the day has even begun.

Being Perfect - Anna Quindlen 2009-01-21

A few times in your life, someone will tell you something so right, so deeply true that it changes you forever. That is what Anna Quindlen, author of the timeless bestseller *A Short Guide to a Happy Life*, does here. In *Being Perfect*, she shares wisdom that, perhaps without knowing it, you have longed to hear: about "the perfection trap," the price you pay when you become ensnared in it, and the key to setting yourself free. Quindlen believes that when your success looks good to the world but doesn't feel good in your heart, it isn't success at all. She asks you to set aside your friends' advice, what your family and co-workers demand, and what society expects, and look at the choices you make every day. When you ask yourself why you are making them, Quindlen encourages you to give this answer: For me. "Because they are what I want, or wish for. Because they reflect who and what I am. . . . That way lies dancing to the melodies spun out by your own heart." At the core of this beautiful book lies the secret of authentic success, the inspiration to embrace your own uniqueness and live the life that is undeniably your own, rich in fulfillment and meaning.

Life Is Short And So Is This Book: Brief Thoughts On Making The Most Of Your Life - Peter Atkins 2011-03

Life is short. You can, if you work hard and are lucky, get more of almost anything, but you can't get more time. Time only goes one way. The average American has a lifespan of less than 30,000 days. So how you choose to live matters. That's the topic of this book. I don't pretend to have all the answers. I'm still learning every day, and many of the good ideas here I've picked up from other people either directly or by reading. But this is what's worked for me. Like life, this book is short. Many books I read could communicate their ideas in fewer pages. So I've tried to be brief in line with the wise person who noted: "If I'd had more time I would have written a shorter letter". I don't think brevity implies lack of content. The concepts here have improved the quality of my life, and I hope they're useful to you as well. Using these concepts, I have created a life I love. My job doesn't feel like work. I love and respect the people with whom I spend time. And I'm also passionate about my life outside work. I've learned how to create a balance that makes me happy between work and other interests, including my family, friends and exercise. Sadly I think that's rare. And yet, while I know I'm lucky, most people can work towards those goals in their own lives. My interest in making the most of my life began when I was just starting college, but when I was in my mid-thirties a boss I admired died of cancer. He was young. He had a great wife; he had three young children; he had a fantastic career - he had everything in life. He just didn't have enough time. So, while I'd often thought about how to get the most out of life, the death of someone so young and vital increased my sense of urgency to act on it. One of the things I've always wanted to do was to work for myself. As a result, I left an exciting job at Microsoft in 2001 amidst the Internet bust to found the investing firm I now run. It was hard to do, both financially and emotionally. When I left Microsoft, many people - friends, family, and even some of the press - thought I was deluding myself to start a fund focused on Internet-related companies during a market crash. A press quote from the time said: "Call him a little crazy. Call him a little nuts." I'd never seen that type of coverage before. And, in a sense, the press was right; the business wasn't easy to start. Fortunately, from a vantage point of ten years down the road, it's worked out quite well. A key part of my job is reading and thinking about a broad variety of topics. So writing this book was relatively easy. It's even easier to read. But, like many things in life, actually executing each day on these concepts is extremely difficult. With thanks to Thomas Edison, life is 1% inspiration and 99% perspiration. Even so, I hope you have fun perspiring. Peter Atkins

Re-Invent Yourself! - Cheryl Garrison 2016-08-12

Cheryl Garrison wrote *Re-Invent Yourself* after meeting numerous women over 50 who were struggling with the reality of growing older. Career change (including downsizing or layoff), empty nest syndrome, failed retirement, failed business, failed relationships and a lack of confidence in the future are just some of the issues facing women over 50. Cheryl begins the book sharing with the reader her personal journey from a "bold and fearless" 20-year-old to a 50something woman who has been defeated by life-altering changes. *Re-Invent Yourself* is a working

guide that chronicles the steps Cheryl took to re-vitalize her life. Why do we stop dreaming after 50something? Why do we think we are too old to start a business or run a marathon? This book answers these questions and then provides resources to help women live out their dreams and aspirations. The book is filled with personal experiences and is divided into 5 chapters, each designed to move the reader closer to creating a Re-Invention Plan which is the objective of the book. Know Yourself - Helps the reader answer the question, "Who are You?" and "What do you Want?." Cheryl believes that at the core of many of the problems women over 50 have is a lack of true identify or an identity that has been lost in the years of giving to others and spending very little time taking care of ourselves. The exercises in this chapter lead women through an assessment of their self-esteem right now and gives techniques for helping them find their true identity. Women completing this chapter will also be able to take a hard look at what they are currently accomplishing in their personal and professional life and begin the process of identifying what they desire to be and do. Heal Yourself- How do we overcome the beliefs that have kept us from succeeding? Cheryl carries the reader through extensive exercises that will help them identify the thoughts that have kept them standing in "cement blocks" and then break through to a life of accomplishment. Re-Invent Yourself- Readers are given the tools needed to take the wants they have identified as important to them and create a lifestyle plan for re-invention. The plan includes goal creation, identifying timelines, budgeting, and accountability in order to ensure that goals become a reality. The reader will create long-term, short-term and immediate goals that support their overall plan. Commit Yourself - The final part of Cheryl's re-invention plan is for the reader to be committed to change. Without making the commitment and being open to change, nothing will change. This chapter encourages the reader to get a digital calendar and keep track of daily progress. The next important part of change is getting an accountability partner who will make the journey with the reader. Finally, surrounding oneself with positive affirmations is an important part in creating lasting and sustained change. Cheryl's goal for the reader after they have completed the book is to celebrate a new life just as she has done. She went from near depression to now writing books, creating training programs, coaching and speaking to women over 50 about living a life of passion and purpose.

Forty Ways to Look at Winston Churchill - Gretchen Rubin 2004-05-11
A WALL STREET JOURNAL SUMMER PICK A WASHINGTON POST BESTSELLER Warrior and writer, genius and crank, rider in the British cavalry's last great charge and inventor of the tank, Winston Churchill led Britain to fight alone against Nazi Germany in the fateful year of 1940 and set the standard for leading a democracy at war. With penetrating insight and vivid anecdotes, Gretchen Rubin makes Churchill accessible and meaningful to twenty-first-century readers by analyzing the many contrasting views of the man: he was an alcoholic, he was not; he was an anachronism, he was a visionary; he was a racist, he was a humanitarian; he was the most quotable man in the history of the English language, he was a bore. Like no other portrait of its famous subject, *Forty Ways to Look at Winston Churchill* is a dazzling display of facts more improbable than fiction. It brings to full realization the depiction of a man too fabulous for any novelist to construct, too complex for even the longest narrative to describe, and too significant ever to be forgotten.

Live Long, Die Short - Roger Landry 2014-01-14

Over a decade ago, a landmark ten-year study by the MacArthur Foundation shattered the stereotypes of aging as a process of slow, genetically determined decline. Researchers found that that 70 percent of physical aging, and about 50 percent of mental aging, is determined by lifestyle, the choices we make every day. That means that if we optimize our lifestyles, we can live longer and "die shorter"—compress the decline period into the very end of a fulfilling, active old age. Dr.

Roger Landry and his colleagues have spent years bringing the MacArthur Study's findings to life with a program called Masterpiece Living. In *Live Long, Die Short*, Landry shares the incredible story of that program and lays out a path for anyone, at any point in life, who wants to achieve authentic health and empower themselves to age in a better way. Writing in a friendly, conversational tone, Dr. Landry encourages you to take a "Lifestyle Inventory" to assess where your health stands now and then leads you through his "Ten Tips," for successful aging, each of which is backed by the latest research, real-life stories, and the insights Landry—a former Air Force surgeon and current preventive medicine physician—has gained in his years of experience. The result is a guide that will reshape your conception of what it means to grow old and equip you with the tools you need to lead a long, healthy, happy life.

The Longevity Code - Kris Verburgh 2019-12-24

Slow down the aging process and live well for longer Do you know exactly how and why you age? And what you can do— whatever your current age—to slow that process and have a longer, healthier life? With the facts laid out, he provides the tools we need to slow down the aging process. His scientifically backed Longevity Staircase outlines a simple yet innovative step-by-step method offering better health and a longer life span—especially the crucial role of proper nutrition and exercise. Dr. Verburgh discusses how new types of vaccines, mitochondrial DNA, CRISPR proteins, and stem cells may help us slow and even reverse aging—now and in the future—and when paired with the right lifestyle, lead to longer, healthier lives than we've ever imagined.

Your guide to healthy sleep - 2011

A Short Guide to a Happy Life - Anna Quindlen 2001-04-01

From the New York Times bestselling author of *Alternate Side*, Anna Quindlen's classic reflection on a meaningful life makes a perfect gift for any occasion. "Life is made of moments, small pieces of silver amidst long stretches of tedium. It would be wonderful if they came to us unsummoned, but particularly in lives as busy as the ones most of us lead now, that won't happen. We have to teach ourselves now to live, really live . . . to love the journey, not the destination." In this treasure of a book, Anna Quindlen, the bestselling novelist and columnist, reflects on what it takes to "get a life"—to live deeply every day and from your own unique self, rather than merely to exist through your days. "Knowledge of our own mortality is the greatest gift God ever gives us," Quindlen writes, "because unless you know the clock is ticking, it is so easy to waste our days, our lives." Her mother died when Quindlen was nineteen: "It was the dividing line between seeing the world in black and white, and in Technicolor. The lights came on for the darkest possible reason. . . . I learned something enduring, in a very short period of time, about life. And that was that it was glorious, and that you had no business taking it for granted." But how to live from that perspective, to fully engage in our days? In *A Short Guide to a Happy Life*, Quindlen guides us with an understanding that comes from knowing how to see the view, the richness in living.

Lifespan - David A. Sinclair 2019-09-10

A NEW YORK TIMES BESTSELLER "Brilliant and enthralling." —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time's most influential people. It's a seemingly undeniable truth that aging is inevitable. But what if everything we've been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: "Aging is a disease, and that disease is treatable." This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair's own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging

technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, *Lifespan* will forever change the way we think about why we age and what we can do about it.

At Peace - Samuel Harrington 2018-02-06

The authoritative, informative, and reassuring guide on end-of-life care for our aging population. Most people say they would like to die quietly at home. But overly aggressive medical advice, coupled with an unrealistic sense of invincibility or overconfidence in our health-care system, results in the majority of elderly patients misguidedly dying in institutions. Many undergo painful procedures instead of having the better and more peaceful death they deserve. *AT PEACE* outlines specific active and passive steps that older patients and their health-care proxies can take to ensure loved ones live their last days comfortably at home and/or in hospice when further aggressive care is inappropriate. Through Dr. Samuel Harrington's own experience with the aging and deaths of his parents and of working with patients, he describes the terminal patterns of the six most common chronic diseases; how to recognize a terminal diagnosis even when the doctor is not clear about it; how to have the hard conversation about end-of-life wishes; how to minimize painful treatments; when to seek hospice care; and how to deal with dementia and other special issues. Informed by more than thirty years of clinical practice, Dr. Harrington came to understand that the American health-care system wasn't designed to treat the aging population with care and compassion. His work as a hospice trustee and later as a hospital trustee drove his passion for helping patients make appropriate end-of-life decisions.

Extra Life - Steven Johnson 2021-05-11

"Offers a useful reminder of the role of modern science in fundamentally transforming all of our lives." —President Barack Obama (on Twitter) "An important book." —Steven Pinker, The New York Times Book Review The surprising and important story of how humans gained what amounts to an extra life, from the bestselling author of *How We Got to Now* and *Where Good Ideas Come From* In 1920, at the end of the last major pandemic, global life expectancy was just over forty years. Today, in many parts of the world, human beings can expect to live more than eighty years. As a species we have doubled our life expectancy in just one century. There are few measures of human progress more astonishing than this increased longevity. *Extra Life* is Steven Johnson's attempt to understand where that progress came from, telling the epic story of one of humanity's greatest achievements. How many of those extra years came from vaccines, or the decrease in famines, or seatbelts? What are the forces that now keep us alive longer? Behind each breakthrough lies an inspiring story of cooperative innovation, of brilliant

thinkers bolstered by strong systems of public support and collaborative networks, and of dedicated activists fighting for meaningful reform. But for all its focus on positive change, this book is also a reminder that meaningful gaps in life expectancy still exist, and that new threats loom on the horizon, as the COVID-19 pandemic has made clear. How do we avoid decreases in life expectancy as our public health systems face unprecedented challenges? What current technologies or interventions that could reduce the impact of future crises are we somehow ignoring? A study in how meaningful change happens in society, *Extra Life* celebrates the enduring power of common goals and public resources, and the heroes of public health and medicine too often ignored in popular accounts of our history. This is the sweeping story of a revolution with immense public and personal consequences: the doubling of the human life span.

Capital in the Twenty-First Century - Thomas Piketty 2017-08-14

What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality—the tendency of returns on capital to exceed the rate of economic growth—today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

Ikigai - Héctor García 2017-08-29

INTERNATIONAL BESTSELLER • 1.5 MILLION+ COPIES SOLD

WORLDWIDE “Workers looking for more fulfilling positions should start by identifying their ikigai.” —Business Insider “One of the unintended—yet positive—consequences of the [pandemic] is that it is forcing people to reevaluate their jobs, careers, and lives. Use this time wisely, find your personal ikigai, and live your best life.” —Forbes Find your ikigai (pronounced ee-key-guy) to live longer and bring more meaning and joy to all your days. “Only staying active will make you want to live a hundred years.” —Japanese proverb According to the Japanese, everyone has an ikigai—a reason for living. And according to the residents of the Japanese village with the world's longest-living people, finding it is the key to a happier and longer life. Having a strong sense of ikigai—where what you love, what you're good at, what you can get paid for, and what the world needs all overlap—means that each day is infused with meaning. It's the reason we get up in the morning. It's also the reason many Japanese never really retire (in fact there's no word in Japanese that means retire in the sense it does in English): They remain active and work at what they enjoy, because they've found a real purpose in life—the happiness of always being busy. In researching this book, the authors interviewed the residents of the Japanese village with the highest percentage of 100-year-olds—one of the world's Blue Zones. *Ikigai* reveals the secrets to their longevity and happiness: how they eat, how they move, how they work, how they foster collaboration and community, and—their best-kept secret—how they find the ikigai that brings satisfaction to their lives. And it provides practical tools to help you discover your own ikigai. Because who doesn't want to find happiness in every day?

The Great Work of Your Life - Stephen Cope 2012-09-25

An inspiring guide to finding your life's purpose—what spiritual teachers call dharma—through mindfulness and self-exploration. Stephen Cope says that in order to have a fulfilling life you must discover the deep purpose hidden at the very core of your self. The secret to unlocking this mystery, he asserts, can be found in the pages of a two-thousand-year-old spiritual classic called the *Bhagavad Gita*—an ancient allegory about the path to dharma, told through a timeless dialogue between the fabled archer, Arjuna, and his divine mentor, Krishna. Cope takes readers on a step-by-step tour of this revered tale and highlights well-known Western lives that embody its central principles—including such luminaries as Jane Goodall, Walt Whitman, Susan B. Anthony, John Keats, and Harriet Tubman, along with stories of ordinary people as well. If you're feeling lost in your own life's journey, *The Great Work of Your Life* may help you to find and to embrace your true calling. How to Help Yourself With Self-Help - Martin Meadows 2019-06-12

Are Self-Help Books Good for Anything? Have you ever bought a self-help book, read it cover to cover, only to find that nothing changed for you? How many hours have you wasted this way, expecting to improve your life by simply being inspired by something you read? The hard truth is that it's easy to read self-help, but difficult to implement it in real life. First you need to figure out what exactly to read, and then you need to know what exactly to do with the advice you find inside. The world of self-help has a lot of traps, and throughout my years as a voracious reader, I've fallen into probably all of them. Now, as both a reader and an author of self-help books, I'd like to share with you some advice on how to use self-help books in a way that will actually help you achieve real-world results. Here are some of the topics I cover in my short guide *How to Help Yourself With Self-Help*: - The 5 most common pitfalls of self-help and how to avoid them (you've probably fallen victim to most of them). - Tips on how to identify what specific area of your life you should target first in order to benefit the most from reading self-help. - What confirmation bias is, why it's dangerous, and how to escape it to stay flexible and enjoy consistent personal growth. - How to interpret the advice you get from a book and tailor it to your life circumstances (cookie-cutter approaches don't work). - Why it's sometimes better to skip self-help books and what to read instead to help you achieve your goals and become a better person. Don't let another self-help title become just another book on your shelf. Learn how to read in a more strategic way and, more importantly, act on the advice you get. Healthy at 100 - John Robbins 2008-12-10

Why do some people age in failing health and sadness, while others grow old with vitality and joy? In this revolutionary book, bestselling author John Robbins presents us with a bold new paradigm of aging, showing us how we can increase not only our lifespan but also our health span. Through the example of four very different cultures that have the distinction of producing some of the world's healthiest, oldest people, Robbins reveals the secrets for living an extended and fulfilling life in which our later years become a period of wisdom, vitality, and happiness. From Abkhazia in the Caucasus south of Russia, where age is beauty, and Vilcabamba in the Andes of South America, where laughter is the greatest medicine, to Hunza in Central Asia, where dance is ageless, and

finally the southern Japanese islands of Okinawa, the modern Shangri-la, where people regularly live beyond a century, Robbins examines how the unique lifestyles of these peoples can influence and improve our own. Bringing the traditions of these ancient and vibrantly healthy cultures together with the latest breakthroughs in medical science, Robbins reveals that, remarkably, they both point in the same direction. The result is an inspirational synthesis of years of research into healthy aging in which Robbins has isolated the characteristics that will enable us to live long and—most important—joyous lives. With an emphasis on simple, wholesome, but satisfying fare, and the addition of a manageable daily exercise routine, many people can experience great improvement in the quality of their lives now and for many years to come. But perhaps more surprising is Robbins' discovery that it is not diet and exercise alone that helps people to live well past one hundred. The quality of personal relationships is enormously important. With startling medical evidence about the effects of our interactions with others, Robbins asserts that loneliness has more impact on lifespan than such known vices as smoking. There is clearly a strong beneficial power to love and connection.
