Worrorra - Mark Clendon
2014-05-12
The Kimberley Arafuran language Worrorra was spoken traditionally on the remote coastline and precipitously beautiful hinterland between the Walcott Inlet and the Prince Regent River. The language described here is that attested by its last full speakers, Patsy Lulpunda, Amy Peters and Daisy Utemorrah. Patsy Lulpunda was a child when Europeans first entered

her country in 1912, and Amy Peters and Daisy Utemorrah both grew up on the Kunmunya mission. This comprehensive and detailed grammar provides as well an historical and cultural context for a society now drastically altered. In the 1950s Worrorra people left their traditional land and from the 1970s the number of people speaking Worrorra as their first language declined dramatically. Worrorra is a highly polysynthetic language,

characterised by overarching concord and a high degree of morphological fusion. Verbal semantics involve a voicing opposition and an extensive system of evidentiality-marking. Worrorra has elaborate systems of pragmatic reference, a derivational morphology that projects agreement-class concord across most lexical categories and complex predicates that incorporate one verb within another. Nouns are distributed among five genders, the intensional properties of which define dynamic oppositions between men and women on the one hand, and earth and sky on the other. This volume will be of interest to morphologists, syntacticians, semanticists, anthropologists, typologists, and readers interested in Australian language and culture generally.

What consequence does Lucifer give his daughter? Celestial Academy: The Complete Series omnibus is all three books in the Celestial Academy trilogy as well as an exclusive bonus novella, Angel Baby & The Holy Grail. Book 1: Ascend My friends always complained about their parents' rules and consequences. Well, I have them beat. I'm the daughter of the devil and was just expelled from my senior year of high school for breaking a guy's nose. Did Lucifer torture my soul? Did he condemn me to the fiery pits of Hell? None of the above. He sent me to Celestial Academy, where college-aged angels go to learn to be guardians. The only problem is I don't have wings, and I'm certainly no saint. Being Lucifer's daughter in a school full of angels is no walk in the park. I'd much rather be tortured in Hell. That is until I meet three men that make me feel like anything is possible. Why choose when I can have them all? Book 2: Descend I'm

meant to save the light from the dark with my four guardians. Whatever that means. The problem is, I'm a mess. Weeks have passed since my world tilted on its axis. Tobias, Asher, and Oliver may have put my shattered heart back together again, but something once broken is never quite the same. Every time I shut my eyes I find myself stuck in an endless loop of fear and worry. And then Reve appears. He waltzed his way into my dreams and swept me off my feet. Will the three angels in my life accept a demon? Will they accept me? I was just starting to figure out who I was... until I discovered my mother was a fraud. Now, I don't even know who I am anymore. Book 3: Transcend School is back in session and we are no closer to getting my dad back. To make matters worse demons have been getting through to Earth at an alarming rate. Hell on Earth is coming, unless I can stop it. In order to save everyone and everything I love, I have to face my fears. With the help of

Tobias, Asher, Oliver, and Reve, I know I can do anything. Even if that means going to a place that sends shivers down my spine. Inferna isn't for the faint of heart. It's called hell for a reason. Not everyone will survive. Will I? Exclusive Novella: Angel Baby & The Holy Grail After months of uncertainty, I can finally relax on my honeymoon. At least for a day. The Holy Grail is still missing and now Oliver must find it or return to heaven. We can't let that happen. Where is the Holy Grail? Angel Baby & The Holy Grail is a 13,000 word novella that picks up after the epilogue of Transcend. Ascend, Descend, and Transcend are fast burn reverse harem full-length novels written with multiple POVs. They contain M/M scenes, light academy bullying, and a teacher/student romance.

Celestial Magic - Emma L. Adams

Devi is having the week from hell. Literally. Devi Lawson has a talent for breaking the rules. It's second only to her skill at hunting down demons -- too bad the angelic guild of celestial soldiers didn't appreciate her efforts. In fact, they kicked her out. And now she's being accused of murdering one of their own. To clear her name, she must work hand in hand with the demons she used to hunt, including the enigmatic warlock Nikolas Castor. Not only is his magic entirely too close to the killer she's pursuing, but he seems to think Devi is marked by a demon, too. Before long, Devi is neck-deep in trouble. Distrusted by her former allies and in serious danger of the real reason she left the guild making it into the light, Devi must catch the killer before he unleashes a literal hell on Earth. Cage of Fire - Emma L. Adams
In the Court of the Dead, kill or be killed takes on a whole other meaning. I'm Bria Kent, and ever since I escaped the deadly magical prison of the House of Fire, I've lived by three rules: always be ready to run, adapt to your surroundings, and do whatever is necessary to survive. When my cover is blown and my best

friend is kidnapped, I have little choice but to seek refuge in the one place my enemies will never find me: the Court of the Dead. The slight problem? Only one fire mage can earn the right to stay on as the Death King's official Fire Element, and the contest has been rigged from the start. My only allies are also my competition -- and the rogue spirit mage partially responsible for getting me into this mess to begin with. Yet he might be my only hope to rescue my best friend and expose a conspiracy within the Court of the Dead before the Death King figures out my real reasons for being here. It's kill or be killed... and I have no intention of losing.

Astrology and Cosmology in Early China - David W.

Pankenier 2013-10-10

The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts,

inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

Adventures in Celestial Mechanics - Victor G.

Szebehely 2008-07-11

A fascinating introduction to the basic principles of orbital mechanics It has been three hundred years since Isaac Newton first formulated laws to explain the orbits of the Moon and the planets of our solar system. In so doing he laid the groundwork for modern science's understanding of the workings of the cosmos and helped pave the way to the age of space exploration. *Adventures in Celestial Mechanics* offers students an enjoyable way to become acquainted with the basic principles involved in the motions of natural and human-made bodies in space. Packed with examples in which these principles are applied to everything from a falling stone

to the Sun, from space probes to galaxies, this updated and revised Second Edition is an ideal introduction to celestial mechanics for students of astronomy, physics, and aerospace engineering. Other features that helped make the first edition of this book the text of choice in colleges and universities across North America include: * Lively historical accounts of important discoveries in celestial mechanics and the men and women who made them * Superb illustrations, photographs, charts, and tables * Helpful chapter-end examples and problem sets

often used for the sake of moving the student along quickly. This book tells the true story-and the whole story. It conveys celestial navigation concepts clearly and in the shortest possible time.It's tailored for navigation in the GPS age-a time of computers, calculators, and web resources. Although it covers all of the traditional methods of 'working a sight, ' the primary thrust is using the (under \$10) scientific calculator. By using equations that you key into your calculator, this book guides you toward a better understanding of the concepts of celestial navigation.You will learn novel ways to plot lines of position, ways to check your sextant accurately by star sights, and how to tell what time it is from a moon sight. The many appendices are a treasure of references and explanations of abstract ideas. Celestial Navigation is a crucial skill for the offshore navigator to know, this book provides the shortest path to that knowledge.

Conflicts of Conscience in Health Care - Holly Fernandez Lynch 2010-08-13

A balanced proposal that protects both a patient's access to care and a physician's ability to refuse to provide certain services for reasons of conscience. Physicians in the United States who refuse to perform a variety of legally permissible medical services because of their own moral

objections are often protected by "conscience clauses." These laws, on the books in nearly every state since the legalization of abortion by Roe v. Wade, shield physicians and other health professionals from such potential consequences of refusal as liability and dismissal. While some praise conscience clauses as protecting important freedoms, opponents, concerned with patient access to care, argue that professional refusals should be tolerated only when they are based on valid medical grounds. In *Conflicts of Conscience in Health Care*, Holly Fernandez Lynch finds a way around the polarizing rhetoric associated with this issue by proposing a compromise that protects both a patient's access to care and a physician's ability to refuse. This focus on compromise is crucial, as new uses of medical technology expand the controversy beyond abortion and contraception to reach an increasing number of doctors and patients. Lynch argues that doctor-patient matching on the

basis of personal moral values would eliminate, or at least minimize, many conflicts of conscience, and suggests that state licensing boards facilitate this goal. Licensing boards would be responsible for balancing the interests of doctors and patients by ensuring a sufficient number of willing physicians such that no physician's refusal leaves a patient entirely without access to desired medical services. This proposed solution, Lynch argues, accommodates patients' freedoms while leaving important room in the profession for individuals who find some of the capabilities of medical technology to be ethically objectionable.
