A Thesaurus of English Word Roots - Horace Gerald Danner 2014-03-27

Horace G. Danner's A Thesaurus of English Word Roots is a compendium of the most-used word roots of the

English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusia.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

A History of Roget's Thesaurus : Origins, Development, and Design - Werner Hüllen 2003-11-27

In 1852 Peter Mark Roget eclipsed a rich tradition of topically based dictionaries with the publication of his *Thesaurus of English Words and Phrases, Classified and Arranged so as to Facilitate the Expression of Ideas*. Based on intuition as much as on specific linguistic principles, Roget's book has been a bestseller ever since and is one of the most widely-used reference works ever published. In this book Werner Hüllen gives the first history of its genesis and publication, and investigates the principles of its structural design. The author opens with an account of Roget's life and his background in natural science. He then charts the parallel histories of dictionaries of synonyms and concepts within the general context of lexicography. Synonymy, he argues, is a necessary feature of languages without which communication would be impossible. He traces its theory and practice from Plato to the emergence of French and English synonym dictionaries in the seventeenth century. Roget's was the first such book to be arranged by topic and the first to encompass the semantic network of the entire language. The author examines the manner and method of its compilation, the practical outcomes of the traditions on which it was based, and the ways in which the *Thesaurus* reflects and reveals Roget's beliefs and background. *A History of Roget's Thesaurus* will interest students and scholars of linguistics, semantics, and lexicography, as well as anyone wishing to know more about a great literary achievement and an astonishing publishing phenomenon.

How to Maximize Your Child's Learning Ability - Lauren Carlile Bradway 2003-09

She then aids you in carefully selecting the toys, activities, and educational strategies that will help reinforce the talents your child was born with, and encourage those skills that come less easily.

Nobel Universal Graphical Language - Milan Randic 2010-05-24

Nobel is a pictographic language based on some 120 basic signs and many arrows of different shape that are mutually combined. It is named after Alfred Nobel (1833-1896), Swedish chemist and industrialist, inventor of dynamite, who left most of his fortune to a foundation that annually gives awards to individuals whose work is characterized as greatest benefit to mankind, known as Nobel Prizes. Besides the awards for sciences and literature significantly, Alfred Nobel included, among others, a prize for peace (that besides individuals, also organizations may obtain). Although it would be utopian to believe that human conflicts could be avoided if communication tools would improve, the emergence of universal languages certainly cannot make the situation worse! Universal languages are a communication tool, which makes it possible for people of no common language to communicate. They are graphic, but they should be distinguished from picture writings, which only passively offer information on some event or give messages. Universal languages have more similarity with the sign languages that are used for people who lost hearing or the sign language of American Plains Indians, who spoke different languages and could communicate by sign language that they developed. However, written language has some advantages over hand sign languages in that one can communicate at a great distance, particularly today in the age of fax and computer communications, and that one can leave messages for posterity. This is not the place to argue for or against the promise of written sign languages. Graphic (written) sign languages exist today, and the best known are Chinese characters used in China and Japan. The problem with Chinese characters is that there are too many characters and it is difficult to learn so many. It takes years for children in China and Japan to learn so many different characters, and the task would be even harder for grown people to learn if they have not done this when young. Nobel is designed to remove this difficulty and is based on the following requirements: 1. SMALL NUMBER OF BASIC SIGNS 2. SIGNS SHOULD BE EASY TO RECOGNIZE 3. SIGNS SHOULD BE EASY TO REPRODUCE 4. COMBINATIONS LIMITED TO THREE SIGNS 5. COMPLEMENTARY We have already mentioned that Nobel uses about 120 basic signs, which can be viewed as a small number, particularly in view of over 100 signs of Nobel that are so obvious that they can be easily absorbed. The other requirements are also very important. There are many signs that can be easily recognized, but in order to be acceptable for Nobel, they also need to be easily reproduced, because that will facilitate communication. Also, when making combinations of signs, one has to make some restriction in order to maintain clarity, so we decided to have no more than three signs combined into single word. Finally, the last requirement, that of complementarities, needs some explanation. Besides having signs that one can easily recognize and easily draw, one needs some structure to be embedded into composition of signs that facilitates one to remember and learn signs easily. We refer to this structure as complementary or, broadly speaking, associational, and what it implies is that words and objects that are related should have related signs. Thus, for example, pairs of words like man-woman, cat-dog, coffee-tea, good-bad, love-hate, etc., should have signs that are in some opposition, while words like smoke-flame-fire, tree-wood-forest, water-sea-ocean, good-better-best should have signs that are in competition. With this in mind when one sees and learns the basic signs, the meaning of many combinations of signs can be in advance anticipated. This helps one to learn Nobel rather fast; not months, not weeks, perhaps not even days, but a couple of hours may suffice that one may learn hundreds and hundreds of words. In this respect, Nobel may be unique among languages written, spoken of,
