Critical Chain - Eliyahu M Goldratt 2017-10-03
This fast-paced business novel does for project management what The Goal and It's Not Luck have done for production and marketing. Goldratt's novels have traditionally slain sacred cows and delivered new ways of looking at processes which seem like common sense once you read them. Critical Chain is no exception. In perhaps Elis most readable book yet, two of the established principles of project management, the engineering estimate and project milestones, are found wanting and dismissed, and other established principles are up for scrutiny - as Goldratt once more applies his Theory of Constraints. The approach is radical, yet clear, understandable and logical. New techniques are introduced, and Project Buffers, Feeding Buffers, Limit Multitasking, Improved Communications and Correct Measurements make them work. Goldratt even handles the complicated statistics of dispersed variability versus accumulated variability so deftly you wont even be aware of learning about them - theyll just seem like more common sense! Critical Chain is critical reading for anyone who deals with projects. If you use block diagrams, drawings or charts to keep track of your activities, you are managing a project - and this book is for you.

Car Guys vs. Bean Counters - Bob Lutz 2011-06-09

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz

out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Economics Does Not Lie - Guy Sorman 2011-02

In 2005, *The Woman at the Washington Zoo* was published to major critical acclaim. The late Marjorie Williams possessed "a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy," observed the New York Times Book Review. Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves "in his laborious baritone" a bank scandal's blow to his re-pu-taaaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, "tah me to the mast!" Patricia Duff sheds "precipitous tears" over her divorce from Ronald Perelman, resembling afterwards "a garden refreshed by spring rain." Reputation illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

The context of natural forest management and FSC certification in Brazil - Claudia Romero 2015-12-30

Management decisions on appropriate practices

and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Standard Guideline for the Collection and Depiction of Existing Subsurface Utility Data - 2003

CI/ASCE Standard 38-02 presents a credible system for classifying the quality of utility location information that is placed in design plans. The Standard addresses issues such as: how utility information can be obtained, what technologies are available to obtain that information; how that information can be conveyed to the information users; who should be responsible for typical collection and depiction tasks; what factors determine which utility quality level attribute to assign to data; and what the relative costs and benefits of the

various quality levels are. Used as a reference or as part of a specification, the Standard will assist engineers, project and utility owners, and constructors in developing strategies to reduce risk by improving the reliability of information on existing subsurface utilities in a defined manner.

Government to Government - Susan Johnson 2000

State and tribal governments have common purposes: to use public resources effectively and efficiently, to provide comprehensive services to their respective citizens, and to protect the natural environment, all while sustaining healthy economies. Neighboring governments, as a practical matter, share many aspects of their respective economic and social systems, and are connected through political and legal relationships. Although these mutual interests have created jurisdictional disputes that historically have been solved through litigation, there is an increasing need for cooperation. Public resources are an issue for all governments, and state and tribes can benefit by collaborating and pooling resources to the fullest extent possible.

America Needs Talent - Jamie Merisotis 2015-09-01

The author of *Human Work in the Age of Smart Machines* presents “a sharp, timely blueprint for unleashing the potential of millions of Americans” (Bruce Kats, Founding Director of the Brookings Metropolitan Policy Program). The president and CEO of Lumina Foundation, Jamie Merisotis is a leading voice in philanthropy, higher education, and public policy. In *America Needs Talent*, he explains the choices that must be made on all levels—in government, education, and the private sector, as well as by individuals—to usher in a new era of success and innovation in America. What if you paid for education based on what you actually learned, instead of the time you spent in class? What if visa applicants were treated like potential assets to our nation’s talent pool, rather than potential threats monitored by Homeland Security? Merisotis proposes bold ideas to successfully deploy the world’s most talented people, revitalize urban hubs, encourage private sector innovation, and power America’s knowledge economy in the 21st century.

Making Color Sing - Jeanne Dobie 2000

In this innovative book, author and crafter Carolyn Dahl demonstrates how printing with a natural material--covering it with a medium and pressing it to a surface--allows artists to see and appreciate exquisite, often-overlooked details and make physical contact with the earth that sustains us. *Natural Impressions* begins with practical guidance on collecting materials and objects, along with basic instructions for making a successful nature print. Divided into three sections--leaves, flowers, and fish--the book clearly demonstrates a variety of techniques using an array of mediums; for example, paints/pigments, bleach, collage, markers, textile paints, and even rubber stamps. Plus, a special section details how nature prints can meet today's technology with photocopying and computer manipulation.

The Essentials of Science and Literacy - Karen Worth 2009

The twenty-first century has brought with it considerable buzz surrounding the connections between science and literacy. Karen Worth and her colleagues have been at the center of this discussion for more than a decade, and they share their very practical ideas and insights. - Lori Fulton Author of *Science Notebooks: Writing About Inquiry* The voice of real teachers is loud and clear--the centerpiece of this very readable and profoundly helpful book. It will be extraordinarily helpful for anyone interested in using writing and talk to enhance the learning in a classroom where students have a direct experience with science as inquiry. -Harold Pratt Past NSTA president The case for cross-disciplinary collaboration is supported by moving testimonials from classroom teachers who joined the authors in their quest for a deeper understanding of the science-literacy connection. A must read for teachers in either domain. -Peter Dow Author of *Outdoor Inquiries: Taking Science Investigations Outside the Classroom* Essentials of Science and

Literacy provides classroom teachers with a wealth of classroom tested and research-based best practices designed to engage students. It addresses one of the major shortcomings in many classrooms, providing students with the time and opportunity to make sense and to communicate their understanding of the science investigation they are engaged in. -Mike Klentschy Author of Scaffolding Science Inquiry Through Lesson Design Karen Worth and her colleagues understand the link between science and literacy connection. Their book is filled with both practical strategies and thought-provoking ideas that invite you to explore how the literacy teaching you may already be doing can be used in science instruction to the benefit of learning and thinking in both domains. This highly readable and profoundly insightful book has three straightforward sections: Essentials, from the nature of scientific inquiry to the importance of teacher questions Talk, from creating a culture of talk to gathering ideas and making meaning Writing, from the anatomy of science notebooks to their implementation and to writing beyond the notebook. A study guide is also included, making Essentials of Science and Literacy ideal for book study with your PLC or preservice teachers. Let Essentials of Science and Literacy inspire you to see the natural fit between your inquiry science teaching and your balanced literacy instruction.

Jersey Shore Impressionists - Roy Pedersen 2013 Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. Jersey Shore Impressionists breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes - for the first time - a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore — from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. "Not since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey," says the book's author,

Roy Pedersen. "Never until now has there appeared a survey of the regional impressionist painters of New Jersey. This book and the accompanying exhibition for the first time celebrate these unrecognized works into the history of New Jersey and American art." Jersey Shore Impressionists is produced in conjunction with a 2013 exhibition at the Morven Museum & Garden in Princeton, NJ. The exhibition, titled "Coastal Impressions: Painters of the Jersey Shore, 1880-1940" seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore's "special light." The first art colony - at Manasquan - forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists - Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation - Edward Boulton, Ida Wells Stroud, Julius Golz - trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey's cultural heritage in particular.

How to Live a Good Life - Jonathan Fields

2018-03-13

Seriously . . . another book that tells you how to live a good life? Don't we have enough of those? You'd think so. Yet, more people than ever are walking through life disconnected, disengaged, dissatisfied, mired in regret, declining health, and a near maniacal state of gut-wrenching autopilot busyness. Whatever is out there isn't getting through. We don't know who to trust. We don't know what's real and what's fantasy. We don't know how and where to begin and we don't want to wade through another minute of advice that gives us hope, then saps our time and leaves us empty. How to Live a Good Life is your antidote; a practical and provocative modern-day manual for the pursuit of a life well lived. No need for blind faith or surrender of intelligence; everything you'll discover is immediately actionable and subject to validation through your own experience. Drawn from the intersection of science, spirituality, and the author's years-long quest to learn at the feet of masters from nearly every tradition and walk of life, this book offers a simple yet powerful model, the "Good Life Buckets " —spend 30 days filling your buckets and reclaiming your life. Each day will bring a new, practical yet powerful idea, along with a specific exploration designed to rekindle deep, loving, and compassionate relationships; cultivate vitality, radiance, and graceful ease; and leave you feeling lit up by the way you contribute to the world, like you're doing the work you were put on the planet to do. How to Live a Good Life is not just a book to be read; it's a path to possibility, to be walked, then lived.

First to the Party - Christopher Baylor 2018

What determines the interests, ideologies, and alliances that make up political parties? In its entire history, the United States has had only a handful of party transformations. First to the Party concludes that groups like unions and churches, not voters or politicians, are the most consistent influences on party transformation.

Chrysler Concept Cars 1940-1970 - David Fetherston 2008-02-01

Chrysler Concept Cars 1940-1970 follows the design, development, and creation of almost 50 Dodge, Chrysler, and Plymouth concept cars during the automotive industry's golden postwar years, when Chrysler set the Detroit Style. Readers get an inside look not only at the styling of the cars, but also of the performance developments and engineers' unique ideas. The book features interviews, profiles, and references to the work of famous Chrysler automotive designers and engineers including Virgil Exner, Chuck Mashigan, Dana Waterman, Elwood P. Engel, John Herlitz, and Jack Charipar.

The Book of Nothing - John D. Barrow 2009-05-20

What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You'll find the answers in this dizzyingly erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology, philosophy, literature, particle physics, and cosmology, The Book of Nothing explores the

enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the vanishing point of our knowledge.

The Saffron Kitchen - Yasmin Crowther
2007-08-28

In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara

follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.
