Psychiatric-Mental Health Nursing - Jeffrey S Jones, DNP, PMHCNS, BC, LNC 2012-03-16 This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is

the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate

integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking, clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan Features NCLEX

preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set. This is a Pageburst digital textbook; The 6th edition of this market-leading textbook offers a clear, straightforward way to understand the often intimidating subject of psychiatric mental health nursing. Its practical, clinical perspective and user-friendly writing style help you quickly master key concepts. Clinical chapters follow the nursing process framework and progress from theory to application with a wealth of real-world examples to prepare you for practice. UNIQUE! A conversational, user-friendly writing style helps you quickly grasp complex psychiatric mental health nursing concepts. Clinical chapters are logically and consistently organized with sections on the clinical picture, epidemiology,

comorbidity, etiology, and application of the nursing process. Clinical chapters follow the nursing process, providing you with consistent guidelines for comprehensive assessment and intervention. Vignettes prepare you for real-world practice with personal, descriptive characterizations of patients with specific psychiatric disorders. Coverage of psychopharmacology in clinical chapters familiarizes you with specific drug treatment options, including the most commonly used drugs and important nursing considerations for their use. Assessment Guidelines boxes list essential guidelines for comprehensive patient assessment. Case Studies with Nursing Care Plans present individualized histories of patients with specific psychiatric disorders and include interventions with rationales and evaluation statements for each patient goal. A separate chapter on cultural implications, as well as Considering Culture boxes throughout the text, provides

essential information on culture, worldviews, and techniques for providing culturally competent care. Coverage of treatment and recovery in the community addresses the need for successful ongoing psychiatric mental health nursing care in the community setting. A chapter on end-of-life care examines the psychological impact of terminal illness and death on patients, families, and nurses. Updated nursing process and clinical chapters keep you current with the latest ANA Psychiatric-Mental Health Nursing: Scope and Standards of Practice. An increased focus on health promotion and recovery reflects federal, state, and local initiatives to improve screening methods, patient and family teaching, rehabilitation, and community treatment options for people who have mental illnesses. Enhanced Evidence-Based Practice boxes emphasize the profound impact of research-and your potential role in that process-on the advancement of psychiatric

treatment options. A new chapter on sleep disorders covers the most common sleep disturbances and their relationships to psychiatric illness, as well as the nurse's role in their assessment and management. A new chapter on sexual dysfunction and sexual disorders examines the complex issue of sexual behavior and provides the information you need to conduct a sexual assessment, identify sexual dysfunctions and disorders, recognize nursing implications, and formulate interventions. **Psychiatric-mental Health Nursing** - American Psychiatric Nurses Association  
2014-01-01

This newly published second edition is the definitive book covering the essentials of psychiatric-mental health (PMH) nursing applicable at all practice levels and settings. It articulates what is expected of all psychiatric-mental health nurses, specifying the who, what, where, when, why and how of their practice. It presents the underlying assumptions and characteristics, addresses matters of environments and settings as well as education and training requirements, and covers key issues and trends

and the ethical and conceptual bases of the specialty. Moreover, it specifies the competencies for nursing practice and professional performance of all PMH registered nurses. While this foundational volume is primarily for those directly involved with psychiatric-mental health nursing practice, education and research, other nursing and allied health care providers, researchers and scholars will find value in this content.

### **Psychiatric and Mental Health Nursing in the UK -**

Katie Evans 2019-06-28

Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful

suggestions about what the mental health nurse can say and do to interact effectively with patients and their families. Gives readers a thorough grounding in the theory of mental health nursing. Case studies throughout the text allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

### **Manual of Psychiatric Nursing Care Planning -**

Elizabeth M. Varcarolis  
2011-01-01

A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning, 4th Edition* helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a

range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term

goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Fundamentals of Mental Health Nursing - Kathryn Neeb

2005-09-28

In this updated edition, Kathryn Neeb continues to squarely address mental health within the scope of practical/vocational nursing, emphasizing that LPN/LVNs most commonly care for patients with psychiatric problems in general patient care settings rather than in specialized psychiatric facilities. This targeted approach, along with her accessible, friendly writing style, meets the legal licensing needs for the role of the LPN/LVN thus making *Fundamentals of Mental Health Nursing* the leader in the LPN educational market.
