Smart Business Networks - Peter H.M. Vervest 2005-12-14
Scientists from management and strategy, information systems, engineering and telecommunications have discussed a novel concept: Smart Business Networks. They see the future as a developing web of people and organizations, bound together in a dynamic and unpredictable way, creating smart outcomes from quickly (re-)configuring links between actors. The question is: What should be done to make the outcomes of such a network 'smart', that is, just a little better than that of your competitor? More agile, with less pain, with more return to all the members of the network, now and over time? The technical answer is to create a 'business operating system' that should run business processes on different organisational platforms.

Business processes would become portable: The end-to-end management of processes running across many different organizations in many different forms would become possible. This book presents you the outcomes of an energizing and new direction in management science.

*Electronic Consumer Contracts
in the Conflict of Laws* - Zheng
Sophia Tang 2009-09-09

The application of private international law to electronic consumer contracts raises new, complex, and controversial questions. It is new because consumer protection was not a private international law concern until very recently and e-commerce only became an important commercial activity within the last ten years. E-consumer contracts generate original questions which have not been considered under traditional private international law theories. It is complex because it has to deal both with difficulties raised by consumer contracts and the challenges of e-commerce. Reasonable resolutions to consumer contracts may prove inappropriate in e-commerce, while effective approaches to resolving private international law problems in e-commerce may be improper for consumer contracts. It is controversial because it concerns the conflicting interests of consumers and businesses in a

fast-moving commercial environment - a fair balance is therefore hard to achieve. Without proper solutions provided by private international law, consumers will not be confident about purchasing online, and businesses will face unreasonable risk and participation costs in e-commerce. Updated and properly designed private international law rules are essential to the further development of e-commerce. This book aims to provide an answer to the urgent requirement for legal certainty, security and justice in e-consumer contracts. It is primarily concerned with existing approaches to jurisdiction and choice of law issues in e-consumer contracts in the European Community and England, but some typical approaches in other jurisdictions are also examined. Based on the analysis and the comparative study of the existing law, the book seeks to provide a proposal as to what the law should be in order to

provide certainty to both parties, to provide reasonable protection to consumers, and to promote the development of e-commerce.

A Handbook of Dispute Resolution - Karl J Mackie
2013-01-11

A Handbook of Dispute Resolution examines the theoretical and practical developments that are transforming the practice of lawyers and other professionals engaged in settling disputes, grievance-handling and litigation. The book explains what distinguishes ADR from other forms of dispute resolution and examines the role ADR can play in a range of contexts where litigation would once have been the only option, such as family law and company law. In some areas, like industrial relations, ADR is not an alternative, but the main method of conflict-intervention, and several contributors draw on their experience of negotiating between management and unions. A wide variety of methods is open to the non-litigious, including

resort to Ombudsmen, negotiation, small claims courts and mini-trials; these and other options receive detailed attention. Given the newness of ADR as a discipline, questions about the training of mediators and about the role of central government have not yet been resolved. The final section of the book is devoted to discussion of these issues. Case studies are drawn from the international arena - examples from China, Canada, Australia, Germany and North America place ADR in a cultural and historical perspective.

Arbitration in India -

Dushyant Dave 2021-02-24

India has a long-standing tradition of dispute resolution through arbitration, with arbitral-type regulations going back to the eighteenth century. Today, amendments to the 1996 Indian Arbitration Act, a steady evolution of case law and new arbitral institutions position India's vibrant system once more at the forefront of international commercial dispute resolution. In this handbook, over forty members of the international arbitration community in India and beyond offer authoritative perspectives and insights into topics on arbitration that matter in India. International arbitration practitioners, Indian practitioners, and scholars have combined efforts to produce a practical and informative guide on the subject. Among numerous notable features, the contributors provide detailed analysis and description of

such aspects of arbitration as the following, with a focus on the Indian context: Indian application of the 1958 New York Convention; law governing the merits of the dispute and awards; investor-state dispute settlement; drafting arbitration clauses for India-centric agreements; managing costs and time; rise of virtual arbitration and technology; effect of public policy in light of extensive Indian jurisprudence; and arbitration of claims relating to environmental damage. Practical features include checklists for drafting arbitration clauses and a comparative chart of major commercial arbitration rules applicable to India. Also included is a comparative analysis of arbitral regimes in India, Singapore and England; chapters on the India Model Bilateral Investment Treaty and ISDS reforms; a special section on the enforcement of foreign awards; a section on the drafting of the award guided by leading arbitrators and stakeholders and a review

of the new 2021 ICC Rules. For foreign counsel and arbitrators with arbitrations in India, this complete and up-to-date analysis provides guidelines for practitioners, corporate counsel, and judges on considerations to be borne in mind with respect to arbitration with an Indian nexus and whilst seeking enforcement and execution of an arbitral award in India. It will prove an effective tool for students and others in understanding and navigating the particularities and peculiarities of India's system of domestic and international commercial arbitration.

The New Regulatory Framework for Consumer Dispute Resolution - Pablo Cortés 2016-11-24

Consumer out-of-court redress in the European Union is experiencing a significant transformation; indeed the current changes are the most important that have occurred in the history of the EU. This is due to the recent implementation of the Alternative Dispute Resolution (ADR) Directive 2013/11/EU and the Online Dispute Resolution (ODR) Regulation (EU) 2013/524. The Directive ensures the availability of quality ADR schemes and sets information obligations on businesses, and the Regulation enables the resolution of consumer disputes through a pan European ODR platform. The New Regulatory Framework for Consumer Dispute Resolution examines the impact of the new EU law in the field of consumer redress. Part I of the volume examines the new European legal framework and the main methods of consumer redress,

including mediation, arbitration, and ombudsman schemes. Part II analyses the implementation of the ADR Directive in nine Member States with very different legal cultures in consumer redress, namely: Belgium, Ireland, Italy, Germany, France, Portugal, Spain, the Netherlands and the UK, as well as the distinct approach taken in the US. Part III evaluates new trends in consumer ADR (CDR) by identifying best practices and looking at future trends in the field. In particular, it offers a vision of the future of CDR which is more than a mere dispute resolution tool, it poses a model on dispute system design for CDR, it examines the challenges of cross-border disputes, it proposes a strategy to promote mediation, and it identifies good practices of CDR and collective redress. The book concludes by calling for the mandatory participation of traders in CDR.

Online Resolution of E-commerce Disputes - Jie Zheng
2020-10-03

This book discusses how technological innovations have affected the resolution of disputes arising from electronic commerce in the European Union, UK and China. Online dispute resolution (ODR) is a form of alternative dispute resolution in which information technology is used to establish a process that is more effective and conducive to resolving the specific types of dispute for which it was created. This book focuses on out-of-court ODR and the resolution of disputes in the field of electronic commerce. It explores the

potential of ODR in this specific e-commerce context and investigates whether the current use of ODR is in line with the principles of access to justice and procedural fairness. Moreover, it examines the major concerns surrounding the development of ODR, e.g. the extent to which electronic ADR agreements are recognized by national courts in cross-border e-commerce transactions, how procedural justice is ensured in ODR proceedings, and whether ODR outcomes can be effectively enforced. To this end, the book assesses the current and potential role of ODR in resolving e-commerce disputes, identifies the legal framework for and legal barriers to the development of ODR, and makes recommendations as to the direction in which practice and the current legal framework should evolve. In closing, the book draws on the latest legislation in the field of e-commerce law and dispute resolution in order to make recommendations for future ODR design, such as the EU

Platform-to-Business Regulation on Promoting Fairness and Transparency for Business Users of Online Intermediation Services (2019) and the United Nations Convention on International Settlement Agreements Resulting from Mediation (2018), which provide the legal basis for ODR's future development.

Law, Technology and Dispute Resolution - Riikka Koulu
2018-09-24

The use of new information and communication technologies both inside the courts and in private online dispute resolution services is quickly changing everyday conflict management. However, the implications of the increasingly disruptive role of technology in dispute resolution remain largely undiscussed. In this book, assistant professor of law

and digitalisation Riikka Koulu examines the multifaceted phenomenon of dispute resolution technology, focusing specifically on private enforcement, which modern technology enables on an unforeseen scale. The increase in private enforcement confounds legal structures and challenges the nation-state's monopoly on violence. And, in this respect, the author argues that the technology-driven privatisation of enforcement - from direct enforcement of e-commerce platforms to self-executing smart contracts in the blockchain - brings the ethics of law's coercive nature out into the open. This development constitutes a new, and dangerous, grey area of conflict management, which calls for transparency and public debate on the ethical implications of dispute resolution technology.

International Dispute Resolution - Vesna Lazić
2018-07-26

The contributions in this book cover a wide range of topics within modern

dispute resolution, which can be summarised as follows: harmonisation, enforcement and alternative dispute resolution. In particular, it looks into the impact of harmonised EU law on national rules of civil procedure and addresses the lack of harmonisation in the US regarding the recognition and enforcement of foreign judgments. Furthermore, the law on enforcement is examined, not only by focusing on US law, but also on how to attach assets in order to enforce a judgment. Finally, it addresses certain types of alternative dispute resolution. In addition, the book looks into the systems and cultures of dispute resolution in several regions of the world, such as the EU, the US and China, that have a high impact on globalisation. Hence, the book is diverse in the sense of dealing with multiple issues in the field of modern dispute resolution. The book offers explorations of the impact of international rules and EU law on domestic civil procedure,

through case studies from, among others, the US, China, Belgium and the Netherlands. The relevance of EU law for the national debate and its impact on the regulation of civil procedure is also considered. Furthermore, several contributions discuss the necessity and possibility of harmonisation in the emergency arbitrator mechanisms in the EU. The harmonisation of private international law rules within the EU, particularly those of a procedural nature, is juxtaposed to the lack thereof in the US. Also, the book offers an overview of the current dispute settlement mechanisms in China. The publication is primarily meant for legal academics in private international law and civil procedure. It will also prove useful to practitioners regularly engaged in cross-border dispute resolution and will be of added value to advanced students, as well as to those with an interest in international litigation and more generally in the area of

dispute resolution. Vesna Lazić is Senior Researcher at the T.M.C. Asser Institute, Associate Professor of Private Law at Utrecht University and Professor of European Civil Procedure at the University of Rijeka. Steven Stuij is an expert in Private International Law and a PhD

Candidate/Guest Researcher at the Erasmus School of Law, Rotterdam. Ton Jongbloed is Guest Editor on this volume./div

Online Dispute Resolution - Gabrielle Kaufmann-Kohler

In a world governed by speed, the Internet plays a growing role in many of today's innovations, and the resolution of disputes using electronic means of communication may soon be part of everyday legal practice. Digital Justice - Ethan Katsh
2017-03-09

Improving access to justice has been an ongoing process, and on-demand justice should be a natural part of our increasingly on-demand society. What can we do for example when Facebook blocks our account, we're harassed on Twitter, discover that our credit report

contains errors, or receive a negative review on Airbnb? How do we effectively resolve these and other such issues? Digital Justice introduces the reader to new technological tools to resolve and prevent disputes bringing dispute resolution to cyberspace, where those who would never look to a court for assistance can find help for instance via a smartphone. The authors focus particular attention on five areas that have seen great innovation as well as large volumes of disputes: ecommerce, healthcare, social media, labor, and the courts. As conflicts escalate with the increase in innovation, the authors emphasize the need for new dispute resolution processes and new ways to avoid disputes, something that has been ignored by those seeking to improve access to justice in the past.

Arbitration in the Digital

Age - Maud Piers 2018-01-25

Arbitration in the Digital Age analyses how technology can be efficiently and legitimately used to further sound arbitration proceedings. The contributions, from a variety of arbitration scholars, report on

current developments, predict future trends, and assesses their impact from a practical, legal, and technical point of view. The book also discusses the relationship between arbitration and the Internet and analyses how social media can affect arbitrators and counsel's behaviour.

Furthermore, it analyses the validity of electronic arbitration and awards, as well as Online Arbitration (OArb).

The volume establishes, on a very practical level, how technology could be used by arbitration institutions, arbitrators, parties to an arbitration and counsel. This book will be of special interest to arbitrators and lawyers involved in international commercial arbitration.
