*The Great Warming* - Brian Fagan 2010-08-01

In this New York Times bestseller, Brian Fagan shows how climate transformed-and sometimes destroyed--human societies during the earth's last global warming phase. From the 10th to 15th centuries the

earth experienced a rise in surface temperature that changed climate worldwide-a preview of today's global warming. In some areas, including much of Western Europe, longer summers brought bountiful crops and population growth that led to cultural flowering. In others, drought shook long-established societies, such as the Maya and the Indians of the American Southwest, whose monumental buildings were left deserted as elaborate social structures collapsed. Brian Fagan examines how subtle changes in the environment had far-reaching effects on human life, in a narrative that sweeps from the Arctic ice cap to the Sahara to the Indian Ocean. The lessons of history suggest we may be yet be underestimating the power of climate change to disrupt our lives today.

### **Konstruowanie historii -**

Anna Peck

Stosunek do własnej historii i roli dziejowej często różni się od sposobu jej postrzegania przez innych. Zjawisko kreowania wizji i interpretacji historycznych stanowi nieodłączny element procesu edukacyjnego. Percepcja oraz sposoby prezentacji polskiej historii i kultury w amerykańskich podręcznikach szkolnych i akademickich w zakresie przedmiotów historii powszechnej, historii europejskiej oraz historii cywilizacji zachodniej były w XX i na początku XXI wieku kształtowane pod wpływem zmieniającej się sytuacji społecznej i politycznej oraz dominujących tendencji naukowych. W koncepcjach filozoficznych i intelektualnych, rozwijanych w Europie Zachodniej i Stanach Zjednoczonych od czasów oświecenia do końca okresu zimnej wojny, najczęściej

wykluczono narody oraz państwa Europy Środkowej i Wschodniej z kręgu dominującej w świecie cywilizacji zachodniej. W konsekwencji Polska, jej historia i kultura były traktowane marginalnie. Autorka analizuje nie tylko zawartość podręczników, lecz także przyczyny, dla których ciągle jeszcze trudno znaleźć informacje m.in. na temat udziału Polaków w drugiej wojnie światowej, Katynia czy powstania warszawskiego.

### **Ecological Public Health -**

Geof Rayner 2013-06-19

What is public health? To some, it is about drains, water, food and housing, all requiring engineering and expert management. To others, it is the State using medicine or health education and tackling unhealthy lifestyles. This book argues that public health thinking needs an overhaul, a return to and modernisation around ecological principles. Ecological Public Health thinking, outlined here, fits the

twenty-first century's challenges. It integrates what the authors call the four dimensions of existence: the material, biological, social and cultural aspects of life. Public health becomes the task of transforming the relationship between people, their circumstances and the biological world of nature and bodies. For Geof Rayner and Tim Lang, this is about facing a number of long-term transitions, some well recognized, others not. These transitions are Demographic, Epidemiological, Urban, Energy, Economic, Nutrition, Biological, Cultural and Democracy itself. The authors argue that identifying large scale transitions such as these refocuses public health actions onto the conditions on which human and eco-systems health interact. Making their case, Rayner and Lang map past confusions in public health images, definitions and models. This is an optimistic book, arguing public health can be rescued from its current dilemmas and frustrations. This

century's agenda is unavoidably complex, however, and requires stronger and more daring combinations of interdisciplinary work, movements and professions locally, nationally and globally. Outlining these in the concluding section, the book charts a positive and reinvigorated institutional purpose.

### **European History -**

IntroBooks 2018-02-19

Europe's relationship with culture, even at the most basic level, dates back to at least 20,000 BCE. The Venus of Willendorf and the cave paintings of Altamira and Lascaux are examples of the presence of civilization in Europe thousands of years ago. By 5000 BC, evidence proves that areas of Europe had begun to show hierarchical societies and a firm agricultural background had been formed by many of these societies. While a clear division of boundaries did not exist back then, the history of Europe if we go back to thousands of years ago, during the Neolithic age, can be mainly traced through their settlements and tools.
