*Feminist Political Ecology* - Dianne Rocheleau 2013-04-15

Feminist Political Ecology explores the gendered relations of ecologies, economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City. Women are often at the centre of these struggles, struggles which concern local knowledge, everyday practice, rights to resources, sustainable development, environmental quality, and social justice. The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements.

**Chicana Movidas** - Dionne Espinoza 2018-06-01

With contributions from a wide array of scholars and activists, including leading Chicana feminists from the period, this groundbreaking anthology is the first collection of scholarly essays and testimonios that focuses on Chicana organizing, activism, and leadership in the movement years. The essays in *Chicana Movidas: New Narratives of Activism and Feminism in the Movement Era* demonstrate how Chicanas enacted a new kind of politics at the intersection of race, class, gender, and sexuality, and developed innovative concepts, tactics, and methodologies that in turn generated new theories, art forms, organizational spaces, and strategies of alliance. These are the technologies of resistance documented in *Chicana Movidas*, a volume that brings together critical biographies of Chicana activists and their bodies of work; essays that focus on understudied organizations, mobilizations, regions, and subjects; examinations of emergent Chicana archives and the politics of collection; and scholarly approaches that challenge the temporal, political, heteronormative, and spatial limits of established Chicano movement narratives. Charting the rise of a field of knowledge that crosses the boundaries of Chicano studies, feminist theory, and queer theory, *Chicana Movidas: New Narratives of Activism and Feminism in the Movement Era* offers a transgenerational perspective on the intellectual and political legacies of early Chicana feminism.

**Non-Linear Time Series Models in Empirical Finance** - Philip Hans Franses 2000-07-27

Although many of the models commonly used in empirical finance are linear, the nature of financial data suggests that non-linear models are more appropriate for forecasting and accurately describing returns and volatility. The enormous number of non-linear time series models appropriate for modeling and forecasting economic time series models makes choosing the best model for a particular application daunting. This classroom-tested advanced undergraduate and graduate textbook, first published in 2000, provides a rigorous treatment of recently developed non-linear models, including regime-switching and artificial neural networks. The focus is on the potential applicability for describing and forecasting financial asset returns and their associated volatility. The models are analysed in detail and are not treated as 'black boxes'. Illustrated using a wide range of financial data, drawn from sources including the financial markets of Tokyo, London and Frankfurt.

**Making Russians** - Darius Staliūnas 2007-01

Making Russians is an innovative study dealing with Russian nationalities policy in Lithuania and Belarus in the aftermath of the 1863 Uprising. The book devotes most attention to imperial confessional and language policy, for in Russian discourse at that time it was religion and language that were considered to be the most important criteria determining nationality. The account of Russian nationalities policy presented here differs considerably from the assessments usually offered by historians from east-central Europe primarily because the author provides a more subtle description of the aims of imperial nationalities policy, rejecting the claim that the Russian authorities consistently sought to assimilate members of other national groups. At the same time the interpretation this study offers opens a discussion with western and Russian historians, especially those, who lay heavy emphasis on discourse analysis. This study asserts that the rhetoric of officials and certain public campaigners was influenced by a concept of political correctness, which condemned all forms of ethnic denationalisation. A closer look at the implementation of discriminatory policy allows us to discern within Russian imperial policy more attempts to assimilate or otherwise repress the cultures of non-dominant national groups than it is possible to appreciate simply by analysing discourse alone.

**Complex Emotions and Grammatical Mismatches** - Katarzyna Dziwirek 2010-07-30

Nominated for the Best contribution to Slavic Linguistics/AATSEEL book award 2011 The concept of the complex emotions is obviously polysemous. On the one hand, we can interpret it as a non-basic, non-prototypical, or culture-specific notion, on the other - and this is the interpretation we propose in this work - a complex emotion concept can be looked upon as a concept whose complexity emerges in interaction, due to the complex nature of its object. Our interpretation is thus construction-based, one in which meaning is not to be found exclusively in the lexical semantics of the term, but also in the, clearly meaning-laden, grammatical construction, e.g. a complement clause, expressing the object or cause of the emotion. The construal of a scene mapped on the form of a complex sentence involves the emotion that is unambiguously complex and not necessarily universal or prototypical. We argue throughout this book that cross-linguistic grammatical mismatches are a visible sign of conceptual and categorizational distinctions between the conceptualization of emotion in different languages and cultures. They also signal differences in what individual speakers consider salient in a portrayed scene. We offer a contrastive corpus-based study of Polish and English emotion concepts and the linguistic patterns they enter. Our theoretical approach combines lexical semantics and cognitive linguistics and proposes a cognitive corpus linguistics methodology. It is a cognitive linguistic endeavor in which we analyze grammatical category mismatches and provide detailed semantic analyses of different complement choices of emotion predicates. We also discuss insights into Polish and English cultural values gleaned from the different underlying categorizations of emotions. Combining theoretical analyses with pedagogical theory and classroom applications, this work breaks new ground and will reach audiences of linguists, teachers and students of Polish, teachers and students of English, translators, and other language researchers and practitioners.

*Anti-Gender Politics in the Populist Moment* - Agnieszka Graff 2021-09-16

This book charts the new phase of global struggles around gender equality and sexual democracy: the ultraconservative mobilization against "gender ideology" and feminist efforts to counteract it. It argues that anti-gender campaigns, which emerged around 2010 in Europe, are not a simple continuation of the anti-feminist backlash dating back to the 1970s, but part of a new political configuration. Opposition to "gender" has become a key element of the rise of right-wing populism, which successfully harnesses the anxiety, shame and anger caused by neoliberalism and threatens to destroy liberal democracy. *Anti-Gender Politics in the Populist Moment* offers a novel conceptualization of the relationship between the ultraconservative anti-gender movement and right-wing populist parties, examining the opportunistic synergy between these actors. The authors map the anti-gender campaigns as a global movement, putting the Polish case in a comparative perspective. They show that the anti-gender rhetoric is best understood as a reactionary critique of neoliberalism as a socio-cultural formation. The book also studies the recent wave of feminist mass mobilizations, viewing the transnational revolt of women as a left populist movement. This is an important study for those doing research in politics, cultural studies, gender and sexuality studies and sociology. It will also be useful for activists and policy makers.

*Topic Continuity in Discourse* - T. Givón 1983-01-01

The functional notion of "topic" or "topicality" has suffered, traditionally, from two distinct drawbacks. First, it has remained largely ill defined or intuitively defined. And second, quite often its definition boiled down to structure-dependent circularity. This volume represents a major departure from past practices, without rejecting both their intuitive appeal and the many good results yielded by them. First, "topic" and "topicality" are re-analyzed as a scalar property, rather than as an either/or discrete prime. Second, the graded property of "topicality" is firmly connected with sensible cognitive notions culled from gestalt psychology, such as "predictability" or "continuity". Third, we develop and utilize precise measures and quantified methods by which the property of "topicality" of clausal arguments can be studied in connected discourse, and thus be properly hinged in its rightful context, that of topic identification, maintenance and recoverability in discourse. Fourth, we show that many grammatical phenomena which used to be studied by linguists in isolation, all partake in one functional domain of grammar, that of topic identification. Finally, we demonstrate the validity of this new approach to the study of "topic" and "topicality" by applying the same text-based quantifying method to a number of typologically-diverse languages, in

studying actual texts. Languages studied here are: Written and spoken English, spoken Spanish, Biblical Hebrew, Amharic, Hausa, Japanese, Chamorro and Ute.

**Video-Based Surveillance Systems** - Graeme A. Jones 2012-12-06

Monitoring of public and private sites has increasingly become a very sensitive issue resulting in a patchwork of privacy laws varying from country to country -though all aimed at protecting the privacy of the citizen. It is important to remember, however, that monitoring and visual surveillance capabilities can also be employed to aid the citizen. The focus of current development is primarily aimed at public and corporate safety applications including the monitoring of railway stations, airports, and inaccessible or dangerous environments. Future research effort, however, has already targeted citizen-oriented applications such as monitoring assistants for the aged and infirm, route-planning and congestion-avoidance tools, and a range of environmental monitoring applications. The latest generation of surveillance systems has eagerly adopted recent technological developments to produce a fully digital pipeline of digital image acquisition, digital data transmission and digital recording. The resultant surveillance products are highly-flexible, capable of generating forensic-quality imagery, and able to exploit existing Internet and wide area network services to provide remote monitoring capability.
