Paint by Sticker Kids: Dinosaurs - Workman Publishing 2020-07-21

Paint by Sticker Kids just gets stronger and stronger, with the last three titles—Unicorns & Magic, Halloween, and Christmas—on fire. With over 1.7 million copies in print, and with sales increasing every season, it is the phenomenal activity book series that marries the joy of paint by number and coloring with every kid's favorite thing—stickers. And now add dinosaurs—what could be better? Kids will have a blast “painting” an armored Ankylosaurus, and an agile Velociraptor, now known to have been covered in feathers. And don't forget about the king of them all: a ferocious T-Rex, which could eat 500 pounds of meat in one bite! New to the series, on the back of each image is a paragraph of lively text packed with facts about the dinosaur pictured, how it lived, and how to pronounce its name. Designed especially for children and their smaller hands, the Paint by Sticker Kids series offers a quiet, completely absorbing, no-mess activity that—bonus!—encourages kids to practice number recognition without them even thinking they're doing math. The way it works is simple: Find the numbered sticker, peel it, and place it in the right space. Add the next, and the next—and see the images come to life in the “low-poly” style that uses geometric shapes. The card-stock pages are perforated, allowing the artwork to be easily removed so kids can hang them up as decorations or proudly display them on the fridge. In other words, hours and hours of artistic fun with none of the hassle or cleanup!

Paint by Sticker Kids - Workman Publishing 2016-04-05

Move over, coloring books! Here's an entirely new craft that kids will love: Paint by Sticker Kids. Paint by Sticker Kids is the same compelling craft first introduced in Paint by Sticker, but just for kids! The book includes everything you need to create 10 bright, playful, full-color illustrations—illustrated templates printed on perforated card stock, and 10 pages of stickers to fill in and create the artwork. The fun, vibrant images are rendered in “low-poly,” a computer graphics style using geometric polygon shapes to create a 3-D effect. As in paint-by-number, each template is divided into hundreds of spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, and place it in the right space. Add the next, and the next, and the next and voila! It's a rocket ship blasting through space. A Tyrannosaurus rex prowling his domain. A pickup truck hauling its load. A friendly toucan hanging on his perch. Kids will love watching these pictures come to life. Plus, each is suitable for framing or the fridge.

Elementary Geography - Charlotte Mason 2016-06-01

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning "the meaning of map," and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which "Geography" so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on "Place"—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Murder and Madness - Matthew Schoenbachler 2009-11-13

The "Kentucky Tragedy" was early America's best known true crime story. In 1825, Jereboam O. Beauchamp assassinated Kentucky attorney general Solomon P. Sharp. The murder, trial, conviction, and execution of the killer, as well as the suicide of his wife, Anna Cooke Beauchamp—fascinated Americans. The episode became the basis of dozens of novels and plays composed by some of the country's most esteemed literary talents, among them Edgar Allan Poe and William Gilmore Simms. In Murder and Madness, Matthew G. Schoenbachler peels away two centuries of myth to provide a more accurate account of the murder. Schoenbachler also reveals how Jereboam and Anna Beauchamp shaped the meaning and memory of the event by manipulating romantic ideals at the heart of early American society. Concocting a story in which Solomon Sharp had seduced and abandoned Anna, the couple transformed a sordid murder—committed because the Beauchamps believed Sharp to be spreading a rumor that Anna had had an affair with a family slave—into a maudlin tale of feminine virtue assailed, honor asserted, and a young rebel's revenge. Murder and Madness reveals the true story behind the murder and demonstrates enduring influence of Romanticism in early America.

Ultimate Sticker Book Bugs - 2021-01-07

A fun, bug-themed book packed with puzzles, quizzes, and, of course, lots and lots of stickers! This colourful children's activity book contains more than 250 stickers. The stickers are reusable and easy-to-peel - perfect for little fingers to add to pages again and again! Kids will love this journey into the world of insects and other creepy crawlies, learning about the different shapes and sizes of bugs, discovering how they camouflage themselves, and learning about specific insects such as grasshoppers and beetles. Fascinating facts accompany simple, fun activities such as follow-the-trail, matching the butterflies to their wings, and a bugs quiz. Children are challenged to find the correct stickers to fill in the blanks in the images, and are encouraged to be creative and create their own scene out of stickers. Meet beautiful butterflies, buzzing bees, colourful caterpillars and more!
